WONDERFUL SECTION

Charlotte County Grows Every Variety of Tobacco.

(Special to The Times-Dispatch.)

CHARLOTTE, VA., Sept. 26.—The crop season just closing has been a good one, except wheat, which was almost a failure. The corn crop is a good one and the tobacco the best raised in forty years. A portion of this, nearly a million pounds, has been destroyed by hail, though much of this is useful for fillers. It is not generally known that this county, especially the middle and upper portion, grows every type of tobacco produced anywhere else in the world.

One can get fillers and wrappers here equal in quality and color to the Cuban and Connecticut grown, and the cigars made from a good priming is mild and of good flavor.

The shipping is superior in texture and quality, and the Austrian Agent Hanne-winkel years ago said the best tobacco he handled grew in middle Charlotte.

Drake's Branch, the county market, sells yearly from four to six million pounds. There are ample warehouse facilities, and with more dealers this amount could be trebled. Land and labor can be had reasonably. The tobacco is here and the finest opening for capitalists in Virginia.

Sale Ten Million Boxes a Year.

Its front was towards the summit. Its rear, if rear it may be called, looked down on a wealth of green fields, and wooded hills, and long reaches of the sinuous river. It was there probably before the Council Chamber, adorned the summit of the hill, before Byrd's Warehouse went up after the great May Fresh of 1776, before the Revolution, and before the memory acquired a license to open his ordinary on a portion of the site, subsequently occupied by the Exchange Hotel. In fact, before the streets and Franklin Street, and other interesting streets, were in existence. Interesting as its history may be, it is a puzzle to the local antiquary. If he consult Mordecai, that fine old fellow, will tell him little besides the fact that it is as ancient as the map of 1856, as the "Harris building."

If he consult old records, which Mordecai has never to have done, he will find one John Mayo, the younger, giving in trust the land and house in which he then lived to Benjamin James, of the local antiquary. TESTIFIED TO USE OF MONEY

(Continued from First Page.)

stubborn when he was asked if he hadn't said that he could get \$100 for testifying that Brauer paid him money. He finally admitted that he had said this, but declared that neither Hechler nor any of his friends had ever tried to influence him in any way.

Following Green, a young man named John Ligan, who has entered suit against Mr. Brauer for alleged slander, swore that Henry Brauer, son of the nominee, had offered him \$25 if he would assert Hechler and support Brauer. He refused. Ligan declared further that Brauer had said to him that he had already bought eight or ten men that day to support his father, and that he would spend \$5,000 or more rather than see him defeated.

The last witness of the day before the committee adjourned was Mr. R. L. Butler, who said that some ten days prior to the primary Mr. Brauer approached him and asked him to see R. R. Childress, a voter at Town Hall, and tell him to work and use his wagon for him (Brauer) on the day of the election, and that he (Brauer) would pay him for his services.

Barksdale Law Again.

Another fierce onslaught was made on the Barksdale law. It was held by Mr. Kiffin that the law and the county plan were distinct, and that if the investigation were made under the first the certificate of election could not be refused, but that the committee could only report its findings to the grand jury. In other words, he held that the Barksdale law, in so far as it referred to the refusal of certificates, does not apply to contests growing out of primaries.

It was contended by the defense that the committee could thus only inquire and report to the grand jury—a proceeding manifestly absurd, since the grand jury would investigate for itself when it got ready. The charges of Mr. Hechler did not come under the head of the "frauds and irregularities" provided for under the county plan, and hence the committee was left to the Barksdale law or nothing. The petitioners said not only that the Barksdale law applied to primary contests and all others, but furthermore that Mr. Hechler's charges came under the head of "frauds and irregularities," and besides this alleged violation of the spirit of the resolution adopted by the committee, pledging itself to stand up for the Barksdale law. Some of the argument on these points was brilliant. Messrs. Fulton, O'Flaherty, Throckmorton and Henson represented Mr. Hechler, and Messrs. Meredith and Sands Mr. Brauer.

The committee finally established its position clearly by declaring its purpose to recognize all violations of the Barksdale law to come under section 8 of the county plan referring to the most discussed "frauds and irregularities." It can thus refuse a certificate if the charges are sustained.

Mr. Barksdale's Letter.

In the course of the proceedings yesterday the following very important letter from Senator W. P. Barksdale to Mr. O'Flaherty was read:

Houston, Va., September 9, 1903.

My Dear O'Flaherty—Your letter to hand and I hasten to reply.

The so-called pure election law unquestionably applies to primaries; it was so intended, and it is so clearly expressed.

It provides against the use of money directly or indirectly to influence voters, and it seems to me to go far beyond bar-room treating voters in a clear violation of the law won the part of the candidate.

I take it section 8 should unquestionably apply before a county committee, as a nominee who had violated its provisions could not hold the office for which he was nominated should be elected thereto.

It seems to me it is the duty and should be the policy of every committee to demand a rigid compliance with the provisions of the law, and in order to protect the nominees and candidates of the party if for no higher purpose. You are at liberty to use this letter as you think proper.

Yours, etc.

W. P. BARKSDALE.

P. S.—There can be no question in my mind that the hiring of vehicles to carry voters to and from canvassers to distribute cards at polls is a violation of the act. Amendments allowing these very things to be done were voted down on the floor of the House.

THE CLIFFTON HOUSE

Some Information Concerning an Old Richmond Landmark.

Editor of The Times-Dispatch:

Some years ago, while the Clifton House was fresh in my mind, I gave The Dispatch a hasty sketch of it. In that article, which I should like to reproduce, were it attainable, I described substantially some of its most striking features. It will suffice now to the curious antiquary to say that the unique building bore, both inside and outside, the old colonial stamp. Whoever designed it must have been a lover of the picturesque in art and in nature. In order to understand the situation of the unique mansion one should divest one's self of ideas recently acquired, and go back in imagination to the last half of the nineteenth century when the great hill was without name other than "Shochock," by which it seems to have been designated in old deeds, when its bold outlines, its lofty summit, its precipitous sides, its broken, eastwardly and southwardly by gullies innumerable, were imposing features of the superficial aspect. Its front was towards the summit. Its rear, if rear it may be called, looked down on a wealth of green fields, and wooded hills, and long reaches of the sinuous river. It was there probably before the Council Chamber, adorned the summit of the hill, before Byrd's Warehouse went up after the great May Fresh of 1776, before the Revolution, and before the memory acquired a license to open his ordinary on a portion of the site, subsequently occupied by the Exchange Hotel. Miss Annie Manly, daughter of Dr.

Workers of School Age.

Editor of The Times-Dispatch:

Sir—Did you ever happen to go to Forest Hill Park, in the early morning, and return about 7 A. M. if so, you may have seen throngs of people hurrying to their various avocations in this city; among them many boys and girls, tender of heart, twenty to fifteen years old, carrying their lunch baskets, prepared to spend the day, and this they have done all through the summer and will continue to do during the winter, through sunshine and storm, through heat and cold, rain and snow, without regard to weather conditions, with, perhaps, only a few days of holiday and yet in spite of such constant work count themselves busy the whole year around. I think that many of these children are thus early forced to encounter the ills which await all who are engaged in the struggle of life, while they ought to be at school or cared for at home.

On the other hand, come with me if you please to Leigh-Street about 8:30 A. M., and what do you see? Why, crowds of well-nigh grown-up men and women hurrying to school after a long vacation, during which they have done nothing but parade the streets and flick in and out of the shows of the city and excursions abroad.

Such is the spectacle which has been presented to our view for two years or more, and there is no abatement of its unwholesome features.

The child's alliance, which is now seeking to overthrow the Constitution of the State, should succeed in their ne-
